

TASK:

A scene from the neolithic - the "stone age" - is shown below. Scenery unspoiled by human interaction.

Sketch **and** annotate either:

- (a) A *permanent* settlement for a family of six.
- (b) A *temporary* shelter for a family two people.

YOU WILL NEED:

Stationary: pens, pencils, eraser, etc.

RESEARCH:

You may want to research 'neolithic settlements'. How were they made? How many people lived there? What design problems did these settlements have?

THINGS TO THINK ABOUT:

What materials would be available and how could these materials be moved and joined together?

Would these materials be weather-proof and what maintenance would be people need to do?

You may also want to think about hygiene, insulation, security and light inside the structure.
